If we did not, we could make mistakes and the quality of our work might get worse. An overworked person may end up by losing the ability to think clearly and by having no energy to go on working. Sleep is one of the ways in which nature renews our energy.

Sports and games are also essential for brain workers, who stay in closed offices and do not have a good chance to exercise their muscles. Such activities as swimming and walking may do them a lot of good, so we should not waste our weekends. They should be made full use of and spent in the open.

But there are also bad sides to it as well.

First of all, children do not get enough exercise because you do not have to move your body much when playing games. Second, your eyesight becomes bad because your eyes are fixed on the computer screen for too long. This is why it is not hard to find children wearing glasses around these days.
