John Sweeney from Ireland started a Facebook page called Suspended Coffees. His message was simple: Buy a cup of coffee for a stranger, because an act of kindness can change a life and make a difference. Eight hours later, the page had attracted more than 20,000 likes. Suspended coffee is a tradition that comes from Naples, Italy, and dates back to the 20th century. When customers buy coffee, they also pay in advance for a cup to be given to somebody else; usually someone who otherwise couldn't afford it. This initiative was forgotten, but then it revived again in 2011. You can buy it for anyone in need. It can be for the homeless person you pass by every day on the street, a stressed student in the middle of exams, a mother of children who can't afford coffee. It's not up to us to judge – if someone asks, then they're in need - no CV required.

Our future won't stay the same. The world is changing dramatically. Imagining future cities with modern technology appears as a dynamic solution to society's recent problems. Some recent researches have suggested that we need to think about the way we imagine future cities, and to focus on some forms of alternative energy such as solar power, wind power, and water power.

We may want our future cities to prioritize environmental renewal. We need to prevent environmental degradation and stop the expansion of deserts. Future cities can collect water and use solar power to irrigate the dry land. Future cities should be surrounded by rivers and provided with renewable energy resources and green vehicles heading towards more ecological forms of public transport.
