Note

Tall Tree and the Eye

Tall Tree and the Eye is a famous sculpture by Anish Kapoor. It stands outside the Guggenheim Museum in Bilbao, Spain. This sculpture is about 13 meters tall. It is made of 73 stainless steel balls, or spheres. Stainless steel is very shiny, so when you look at Tall Tree and the Eye, you can see your own face many times. The spheres are arranged in an irregular pattern. This makes them look like bubbles which are floating!

My pottery project

My class worked on a pottery at school this week. We started with a lump of clay, and we chose what to make. I wanted to make a bowl. First, the teacher showed us how to use a pottery wheel. Then it was our turn. We put on aprons over our clothes. When I put my clay on the wheel, it went fast. It was difficult, and I got messy. When my bowl was finished, the teacher put it in a kiln. This is a special oven which gets very hot. It makes the clay hard and strong. Finally, the bowl was ready and the teacher took it out. We waited for the bowl to be cool, and then I used special paint to decorate my bowl.

Subject: A famous sculptor

Dear Ali,

How are things? I'd like to tell you about a famous sculptor. Kapoor is a great artist. He was born in India. He studied art in the UK. He likes to use new shapes as well as different materials. He understands maths well, and he also understands materials. He can make sculptures that will stay in a place for a long time. He uses stainless steel because it stays shiny and bad weather doesn't damage it.

Yours,
Omar

A school show

Yesterday, it was the school show. It was in a play because I like acting. Tamer was the photographer for the school show. When each person was on stage, Tamer took photos. The play was about a family at home in the living room. We needed some furniture like a sofa, a lamp, or some pictures for the wall. My teacher Mr Ali is very good at making things. He shows me what I do.
