Topics for paragraphs

» Unit (1)

1 Unhealthy habits :

It's fun to play video games sometimes, but it's good to be active as well. Sitting still for a long time isn't good for your health. Sometimes people eat more unhealthy snacks when they are watching TV or playing on the computer. Try not to develop unhealthy habits.

2 My body :

Our body consists of many systems. We use our digestive system when we eat and drink. We use our respiratory system when we breathe. Our skeleton is made up of all the bones in our body. Muscles are attached to our bones. We need to keep our bodies strong and healthy.

3 Digestive system :

We use our digestive system when we eat and drink. We put food in our mouth. We chew and swallow food. We chew food with our teeth. Then, it goes to our stomach. In the stomach, a special liquid changes the food into energy and nutrients that we need in our bodies.

4 Braille code :

People who are blind or cannot see well can learn to read Braille. It has different combinations of dots. They can be a letter, number, punctuation mark or a word. People feel the dots with their fingers. So, they are using the dots to find out what they mean. Braille was invented by Louis Braille.

5 The Paralympic Games :

The Paralympic Games is an international competition for athletes with disabilities. It takes place every four years. It is held in a different country each time. Paralympics is an important area in sports. Egypt has many athletes who take part in these competitions. Being a Paralympic athlete takes years of dedication and hard work.

6 A healthy diet :

We all need to follow a good diet to stay healthy. A good diet includes lots of fresh food and plenty of water to drink. About 75% of our brain is made up of water and it needs water to work well. We should eat fresh fruit and vegetables because they have a lot of fiber and are full of vitamins and minerals. We need these for healthy skin, muscles, bones, and teeth. We should eat plenty of protein, too, as this helps us grow.

Unit (2)**1 Birds :**

Birds are warm-blooded vertebrates. They don't have fur or hair. All birds have feathers. In addition, they all have wings. Birds lay eggs which are hard. Most birds can fly. However, there are some birds that can't fly such as the ostrich.

2 Fish :

Fish live in water. They use their gills to take in oxygen. They can't breathe air. They are cold-blooded and they lay eggs. They use their fins to move.

3 Reptiles :

Reptiles are cold-blooded so they spend time in the sun to keep warm. Most reptiles have four legs. They don't have hair or fur. They have scales. In addition, all reptiles lay eggs. They live on land or rivers.

4 Invertebrates :

Invertebrates don't have backbones. They are cold-blooded. They live in the sea but some live on land. Some have soft bodies and some have hard shells. Some invertebrates can swim and some can walk. Arachnids are not insects.

5 Mammals :

Most mammals live on land, but some mammals such as whales and dolphins live in the sea. However, bats are the only mammals that can fly. Bats live in groups in trees or caves. They sleep during the day and hunt for food at night. They can fly very fast at night because they can see using a special skill called echolocation. In addition, bats are helpful to humans and the environment.

6 What animals do to protect themselves :

There are many animals that can protect themselves. Some invertebrates have a hard shell for protection. Some animals such as bears have big teeth and claws to protect themselves. Some have poisonous bites, such as snakes and some spiders. Birds can fly away to protect themselves. Other animals can run fast.

7 Having a pet :

It's fun to watch pets. It's good to learn about how to look after them. You can learn about their species. Some animals such as dogs need to walk. They need a lot of care and attention. It can be expensive to have a pet.
