السؤال الثالث (نظرة العموم)

1. The current environmental situation is very serious. I don't think there's a solution to the global environmental problem. The world's population is now too high, and the amount of energy being used is increasing all the time. Isn't it obvious that one day soon we're going to run out of natural resources? Global warming shows us the effect that human beings are already having on the planet - it's happening because of all the greenhouse gases we put into the atmosphere from industry, planes and cars and because of other things like deforestation. Soon, millions of people will start leaving some parts of the world because it will be impossible to live there anymore, which in turn will create a whole new set of problems. So, people just need to be made aware of the problem and shown ways in which **they** can help

2. Neil Armstrong was the first astronaut to land on the moon's surface. There was a video camera on the spacecraft that was filming the event for everyone on Earth to see. When he set foot on the moon's surface, he remarked, "That's one small step for man, one giant leap for mankind." He was the first human being to ever set foot on another world. Buzz Aldrin exited the spacecraft, the Eagle next. The two men discovered that the moon's surface was covered in a powdery dust. The two astronauts found it easy to move around on the moon, even in their space suits, because the moon's gravity was less than Earth's. Aldrin and Armstrong placed an American flag on the moon. Next, they collected rocks and dust samples that would be brought back to Earth for scientific study. They even got to talk to President Nixon from the surface of the moon. They returned to the Earth safely.

"A review of Natural wonders of Egypt"

Egypt has a lot of natural wonders. People should know about them in order to visit them. The most famous natural wonders are the White Desert National Park, Al Nayzak Lake and Gebel Elba. The White Desert National Park is an amazing place because it contains five oases with rocks. It is a wonder because the colours of the rocks change and look beautiful. Al Nayzak Lake is called the Shooting Star. It has the shape of an eye. It is one of the best places to dive and swim. Gebel Elba is a national park. Although it is a desert land, it is unusually green and home to many animals and birds.

"A review of things we can recycle"

Recycling things has become one of the most important things these days. We should start recycling because it is a good way to help our planet. There are many things we can recycle. We can recycle paper, plastic, water and other things. If we recycle paper, we will avoid cutting more trees. This will help to reduce pollution. We can recycle water to use it again for growing plants and washing cars. Plastic objects can be recycled. We can use the recycled plastic again for making many things such as bags and bottles. We can recycle cotton and wool to make clothes. To conclude, recycling is very important for both people and the

"How to reduce global warming"

Global warming is one of the most dangerous problems that all countries around the world have. It affects all countries and all habitats. We should do our best to find solutions to this problem. There are a lot of things we can do. Firstly, we should plant more trees. Trees help to increase oxygen and reduce pollution. Secondly, we should recycle rubbish instead of putting it in landfill sites. If we do that, there will be fewer gases. Thirdly, we should reduce our use of fossil fuels such as oil and gas. They cause much pollution. We should start using renewable sources of energy. They are clean and don't pollute the environment.

"A biography of Farouk El - Baz"

Farouk El - Baz is one of the most important scientists in the world. Farouk El-Baz is an Egyptian American space scientist and geologist. He worked with NASA in the scientific exploration of the Moon and the planning of the Apollo program. He is one of the most important scientists who had done a lot of research before the first man walked on the moon. He helped astronauts to land on the moon. He gave advice to astronauts to collect the rock on the moon. He has studied deserts. He used satellites to find underground water in the desert. His work has helped a lot of countries to find water.

"A review of forms of renewable energy"

Renewable energy is the best form of energy that we use these days. It is good for the environment. There are many forms of renewable energy. They are solar energy, wind power and hydroelectric. The energy from the sun is called solar energy. The wind can be used to make electricity. We use wind turbines to make electricity. We can use water to make electricity. This form is called hydroelectric. We must use these forms of energy instead of fossil fuels for many reasons. They are green. They are cheap and continue for a long time. I mean they are reusable. All countries now have started using all these forms of energy.

"A review of climate change"

Climate change is one of the worst problems that we face. All countries around the world suffer from this problem. There are many reasons for climate change. The main reason is pollution. Pollution produce gases that make the temperature of the earth get higher and higher. Another reason is cutting down trees. Although it is a dangerous problem, it is easy to solve it. We should reduce the amount of pollution. We should stop using fossil fuels. We should use renewable sources of energy that don't cause pollution. We must stop deforestation. We should plant more trees along streets. If we do that, we will solve this problem easily.

"The importance of satellites"

Satellites have become very important all over the world. We have used satellites for many things we do every day. We use it for GPS, weather reports, TV and the internet and mobiles phones. GPS is used to show us the way. We use satellites for weather reports. Satellites allow us to study the weather. They show how clouds and storms are moving. We also use satellites for TV and the internet. Lots of people have satellite TV so that they can watch their favourite shows and sports matches. Satellites are used in mobile phones. Satellite phones can work anywhere in the world. They are very useful in places far from cities, such as on mountains or in deserts.

" Different habitats "

There are many different habitats around the world. These habitats are important for the life of people and animals on Earth. The main habitats are Coastal , Grassland, wetland and polar habitat. The Coastal habitat is found along the coast of the sea. The grassland habitat is usually found between mountains and deserts. It is a home of some animals. The wetland habitat is often covered by water. The polar habitats are found at the top and bottom of the Earth. They are covered by ice. They are the habitats of polar bears. The temperature there is freezing. Without these habitats, some animals would disappear from Earth

"A short story I have read recently"

It is a story about horses; their life, their habits and their loyalty. A horse is an animal which can feel and sense like people. Black Beauty is a horse born kind and beautiful. He never kicks or bites even when people make him sad. He treats his owner gently. If there are any dangers on the road, he stops at once to save the lives of his riders. If it is owned by a poor person, he never complains. He may not get enough food and may get ill but he goes on working. Sometimes he travels to long distances and difficult destinations and stays calm. He also may feel pains and there are some bad owners who hit their horses. I think the moral of this story that animals are not machines!
