

A-Read the following text and do the tasks below:

Today's techniques, surgeries and drugs have decreased the overall deaths among humans. Medical inventions like X-ray Imaging, functional Magnetic Resonance Imaging (MRI), Robotic Surgery and Organ Transplants have changed medicine forever. An X-ray is a common imaging test that has been used for decades. It is an image created on a photographic film or electronically on a digital system, using an external radiation to produce images of the body. X-ray Imaging can help doctors view the inside of the patient's body without having to make an incision. This can help surgeons diagnose, monitor and treat many medical conditions. Magnetic Resonance Imaging (MRI) is a medical imaging technique used in radiography to form pictures of the anatomy and the physiological-processes of the body. MRI scanners use strong magnetic fields and radio waves to generate images of the organs in the body.

Choose the right answer (a ,b, or c) to complete the following:

1. X-Ray allows doctors to see the inside the body

- a- Magnetic fields b- Sound waves
c- External radiation d- A&B

5. How have medical techniques, surgeries, and drugs impacted human mortality?

- a- Increased problems
b- The number of deaths was reduced
c- The number of deaths rose
d- No impact

B-Read the following text and do the tasks below:

Artificial heart transplanting has evolved over decades saving countless lives. In summary, the emerging medical devices and technologies, especially the mobile phones and tiny Nano-sized sensors embedded in several electronic devices that enable sending and receiving information wirelessly, are changing the face of 21st century medical practice. Currently, people born with diseases or any other body defects can now be healed with the help of advanced technology. Furthermore, various advances in medical field have saved millions of lives and improved many others. The new technologies will allow remote monitoring of patients and their access to healthcare, health data collection and information exchange with the providers and other patients. Such benefits would continue to increase with the fast pace development of medical health technologies.

Choose the right answer (a ,b, or c) to complete the following:

1. Artificial heart transplanting has evolved over decades saving lives.
