When we think about the future, we tend to assume that most things will stay the same. This is almost never the case. The world is changing and the changes are very dramatic. Imagining future cities with modern technology appears as a dynamic solution to society's recent problems. Some recent researches have suggested that we need to focus on some forms of alternative energies such as solar power, wind power, and water power which lead to environmental sustainability. We need to prevent environmental degradation and stop the expansion of deserts. Future cities can collect water and use solar power to irrigate the dry land.

Choose the right answer (a ,b, c or d) to complete the following:

- is one of the alternative powers.

Someday people will live in space. By the end of this century, there will be permanent settlements that will allow people to lead a normal life in space.

Hundreds of astronauts are going to work and live in the space station, which will take ten years to build. In some way living on the moon will be easier than living in a space station, and it will be cheaper because people won't bring everything from the Earth by rockets.

The space city will be like a gigantic glass wheel that will contain buildings, factories and special meeting places. Inside it, people won't live differently from small towns on the Earth.

Your school

<p>My school is the best school. I like it because I have a great time there. We learn many things there. It has many classrooms and a nice library full of books. However, its laboratory is not good enough. It needs some materials and devices to be better.</p>	<p>مدرستي هي أفضل مدرسة. أحبها لأنني أقضي وقتاً رائعاً هناك. نتعلم أشياء عديدة هناك. لديها صفوف عديدة ومكتبة جميلة مليئة بالكتب. على أي حال، إن مخبرها ليس جيداً بما يكفي. يحتاج لبعض المواد والأجهزة ليكون أفضل.</p>
