Suspended coffee is a tradition that comes from Naples, Italy, and dates to the 20th century. Success is mostly connected with becoming rich, famous, and respected at work.

Being successful could mean simply being satisfied with oneself and one's career. For many people, a successful person is someone who feels that his or her work and life in general offer a very high degree of satisfactions.

It seems that successful people always do two things:

- They use their natural abilities in their work.
- They set career and life goals.

In other words, successful people choose careers where they can use their natural abilities, or do what comes naturally to them. For example, successful teachers are people who know how to help people learn, and the best doctors are those who know how to listen to people. Successful people know where they are starting from, and what direction they want to give their lives and careers, even if it is something as simple and wonderful as raising a happy family.

- Most people think that if you are rich then you are successful. ()
- If you hate your career then you might be successful. ()

Martin Sterl swam 5,268 kilometres of the Amazon River in 66 days. He is the only man in the world to do this, breaking all world records.

Martin has swum the Danube, the Mississippi and the Yangtze rivers. They are more than 3,000 kilometres long. But swimming the Amazon is more dangerous. The river is very wide and deep with strong currents. Heavy rain sometimes continues for days. This rain makes it dangerous above the water. It is also dangerous under the water, because hungry piranha fish wait to attack. Martin prepared himself before his long swim. For months he swam three to five hours every day and practiced in the gym to be strong. He also travelled to the Amazon to learn about the river and its dangers. He talked to doctors. They told him how to protect himself against dangerous diseases.
