- A. Yes, let's do it.
- B. Thanks for help.
- C. The food was great.
- D. I'd love some juice.

Reading

Directions: Read the passage and answer the questions.

MY TREE

- 1) When I was three years old, my parents took me to a nursery. We bought a young apple tree. It was just a sapling. We planted it in our yard. I watered it once a day all summer long.
- 2) Finally, last year, the tree was covered with pinkish-white blossoms. A few months later, there were tiny, green apples on the branches. I counted six.
- 3) This year, I'm nine years old. My mother said there might be enough apples on my tree to bake a pie. I have already picked out a recipe from the cookbook. I will peel and cut the apples myself. My mom will help with the crust. Then we'll all eat the pie. Another good thing about my tree is the shade it gives in the summer. I like to sit **beneath** it and read a book, or just watch bees and butterflies.
- 4) My sister is now three years old. She's the age I was when we bought my tree. We'll all go to the nursery again this year and help her pick out a tree of her own. I hope she picks a cherry tree. Then we could also have cherry pies. I told her she will have to wait for her tree to bear fruit. I love my tree, and I'm happy for my sister that she will also get a tree too.

1. What is the main idea of the text?

- A. A boy likes apples.
- B. A boy having his own tree.
- C. A boy having his own apples.
- D. A boy gets a tree to his sister.

2. How many apples did the tree have last year?

- A. 5 apples
- B. 6 apples
- C. 9 apples
- D. 10 apples

3. How did the boy feel about getting apples from the tree?

4. What does the boy hope his sister pick?

5. How old is the boy's this sister?

6. What does the boy do in the shade?

Read the passage and answer the questions.

THE LIFE CYCLE

- 1) When you plant a seed, does it stay a seed forever? No! Plants and animals grow and change throughout their lives.
- 2) Many plants begin as seeds. As the seed gets what it needs (water, sunlight, and nutrients from the soil), it begins to grow. The seed turns into a little sprout. It keeps growing until it is a full-grown plant. Then the plant makes new seeds, so that new plants can grow even after the plant grows old and dies. Those seeds will then go through their growth process. Because seeds go through this process over and over again, it is called a life cycle.
- 3) Animals also have life cycles. A frog begins as an egg. When the egg **hatches**, it turns into a tadpole. The tadpoles grow legs and arms, and eventually grow into adult frogs. The adult frogs lay eggs, so that new frogs can live even after the frog grows old and dies.
- 4) A dog's life cycle is a little different than a frog's, because a dog does not start out as an egg. It is born from its mother's belly. The puppy keeps growing and is eventually an adult dog. Then the adult dog might have puppies to continue the life cycle!
- 5) Insects like caterpillars go through life cycles, too. Caterpillars begin as eggs. When they hatch, they are larva. The caterpillar becomes a pupa, and inside of the pupa it turns into an adult. The adult is not a caterpillar; it is a butterfly! Then the butterfly lays eggs, so that new caterpillars and butterflies can live even after the butterfly grows old and dies.
- 6) Plants and animals don't stay the same throughout their lives because they grow and change through their life cycle.

1. **What is the main idea of the text?**

- A. the life cycle of dogs
- B. the life cycle of frogs
- C. the life cycle of plants
- D. the life cycle of different beings

2. **What is the most likely meaning of the underlined word "hatches" in paragraph 3?**

- A. runs
- B. grows
- C. breaks
- D. begins

3. **What is the first stage in a frog's life?**

4. **What does a seed need to grow?**

5. **Why is the life cycle of a dog different from the frog?**

6. **Why don't plants and animals stay the same throughout their lives?**

Read the passage and answer the questions.

A material is what something is made of. There are 5 basic materials. They are metal, glass, wood, cloth, and plastic. Most things are made of these materials. There are some other materials. But they are not used as much as these 5 materials.

Let's talk about metal first. Metal is heavy, very hard and strong. We use metal to make lots of things. We use it for forks, knives, keys and even cars because it is very strong.

Next, let's talk about glass. Glass is very smooth and feels cool to touch. It is not as heavy as metal. It is hard but not strong. It breaks very easily! Then why do we use it? Because it is clear to see through.

Now, let's talk about wood. Wood is lighter than metal and glass. It is not as strong as metal but much stronger than glass. We use wood to make lots of things. Things made from wood are usually light and strong. Chairs and tables, pencils are made from wood.

Now let's talk about cloth. Cloth is very light. It is much lighter than wood. And it is very soft. We use cloth to make many things like clothes, blankets and curtains.

Finally, plastic. Plastic is also very light. Sometimes it is soft and sometimes hard. Plastic can be used to make thin plastic bags which are light, soft, and strong. But it can also be used to make helmets which are hard and strong. A helmet and a bag seem different. But they are both made from plastic.

1. What's the mainly about?

- A. the origin of materials
- B. the five basic materials
- C. different uses of plastic
- D. the importance of metal

2. According to the text, which of these things is a material?

- A. chairs
- B. plastic
- C. clothes
- D. windows

3. According to the text, how does glass feel?

4. According to the text, what is a material?

5. According to the text, what is cloth used for?

6. According to the text, why are bags and helmets similar?
