Deir el-Medina:

Deir el-Medina was an ancient Egyptian **village** where the skilled craftsmen lived. These workers were famous because they built the **royal tombs** in the Valley of the Kings. **Archaeologists** have discovered many interesting things in their houses, such as old **pottery** and personal notes. On the walls, there are colorful **drawings** that show how the workers decorated their homes. They even wrote messages on pieces of stone. This site helps us understand the daily lives of the people who created Egypt's great monuments. It is a very important part of Egypt's history..

Temple of Dakka:

The **Temple of Dakka** is an amazing ancient monument located in **Nubia**. This unique **temple** was originally built to honor Thoth, the god of wisdom. Over many years, different Greek and Roman rulers added their own carvings and decorations to the walls. When the water level of the Nile rose due to the High Dam, experts carefully moved the entire structure to higher ground to save it. Today, it stands as a proud symbol of Egypt's history..

Tuna el-Gebel:

Tuna el-Gebel is a famous archaeological site in Egypt known for its incredible ancient **discoveries**. It served as the necropolis for the city of Hermopolis, where many **mummies** of animals and humans were buried. Archaeologists found thousands of sacred ibises and baboons preserved there to honor the god Thoth. These findings help us understand the unique traditions and history of ancient Egypt

The ancient Egyptian loom:

The ancient Egyptian loom was a brilliant invention used to create high-quality **fabric**. To build one, craftsmen had to carefully **assemble** wooden beams and frames. This machine helped the Egyptians turn flax into linen to make their clothes. It is a great example of how modern machines, like the loom, **simplify** work and **save** time. Today, we are still proud of this part of our rich Egyptian history

An invention you want to create:

I want to create a special **solar-powered robot** that helps clean the oceans. First, I will draw a detailed **blueprint** to show how the parts fit together. Then, I will **assemble** the metal frame and add strong sensors to find plastic waste. This machine will **simplify** the work of cleaners and **save** time. I hope my invention helps protect the environment and keeps the water clean for all sea creatures.
