4. What kind of environment is in the Nile Delta?

The kind of environment in the Nile Delta is the coastal environment.

5- Write a paragraph of (40) words using the following elements:

Different environment

Ideas to help you: Desert - coastal - rainforest - urban - rural.

Environments around the world We have different environments around the world. In the rainforest, there are lots of trees and insects. It often rains and the temperature is hot. The desert is very dry. Plants and animals have to find clever ways to survive there. Polar environment is very cold and windy. There aren't any trees or flowers there.

Problems of transportation

Ideas to help you: gasoline - electric buses

Transportation causes a lot of problems. Some vehicles use gasoline, which causes air pollution. People bought cars to make their lives easier. Today, there are electric buses that use some solar energy from solar panels on their roofs. Engineers are designing greener airplanes and ships that don't use gasoline.

Fossil fuels

Ideas to help you: coal - carbon dioxide.

Fossil fuels are things like coal, gas, and oil. These are burned in factories or used to make homes and buildings warm. Fossil fuels are non-renewable. When they run out, we can't find or make more of them. Fossil fuels are made from remains of very old plants and animals that lived on Earth a long time ago. When we burn them, a lot of carbon dioxide is released into the atmosphere.

Erosion

Ideas to help you: erode - Drought

Erosion is a natural process. It happens by water, wind, or flows. The waves and currents in the sea can erode beaches, and rivers can erode riverbanks. Heavy agriculture is one way that people do this. Burning fossil fuels is another way because it results in climate change. Drought happens where there is not enough rain for a long time. When this happens, rivers and lakes become dry.

The High Dam

Ideas to help you: generate - electricity.

The High Dam was finished in 1971. It uses water from the River Nile to generate electricity. The location of Aswan made this a good place to build the dam. The dam could stop the River Nile from flooding. The dam has twelve large turbines inside. It generates more than 10 billion kilowatt hours of electricity a year.
