4. Read the following text and answer the questions: (7 Marks)

Everything we do on the internet leaves a permanent mark. This is called a digital footprint. There are two main types: active and passive. Active footprints happen when you choose to share things, like posting a photo or a comment. Passive footprints happen without your knowing, like when websites collect data about what you look for. Future schools or even jobs might look at your posts to get an idea of your personality. That is why it is essential to be smart and kind online. Once something is posted, it stays there forever. Always think twice before clicking or sharing personal details. Keeping your information secure helps you build a positive online identity that you can be proud of in the future.

4. Read the following text and answer the questions: (7 Marks)

Digital detectives are people who know how to stay safe in the digital age. They understand that every action online leaves a trace. To be a digital detective, you must first secure your accounts. Using a complex password with numbers and symbols is a great step. You also need to be aware of what information you share. Personal data like your school name or home address should never be public. Another important thing is to update your apps. These updates often include better security to stop people from stealing your data. If someone tries to hack your account, you will be safe if you follow these rules. Remember, your digital world is as important as your real life, so keep it safe and clean.

A) Choose the correct answer from a, b, c or d: (1 Mark)

- The underlined pronoun "it" refers to the
a) real life b) school name c) digital world d) complex password
- App updates are important because they provide better
a) games b) security c) photos d) symbols

B) Answer the following questions: (6 Mark)

4. What should a digital detective do to secure their accounts?
.....

Write a text of ONE HUNDRED (100) words on: (4 Marks)

" A Day in Your Digital Life: Staying Balanced and Safe "

.....
.....
.....
.....

Test (1) Listening Material:

Welcome to Web Guardians! Today, we explore our digital footprint. A digital footprint is like a trail of breadcrumbs you leave behind whenever you are online. It includes everything you do, from visiting websites to sharing posts. It is very important to keep your personal information private because it can be seen by others. Always think before you post to keep your privacy secure.

Test (2) Listening Material:

Our digital lives are very important. You must be careful because once something is online, it stays there forever. To stay secure, you should use strong passwords and never share personal data. Also, make sure your apps have the latest updates. Old software can be risky because it can be used to steal your data. Think before you post!
